

F-Series F75, F50 and F30 Fiber Laser Marking Systems

The TELESIS F-Series is a family of maintenance free Q-switched ytterbium fiber lasers specifically designed for marking applications with average power levels from 30-75W. These lasers deliver a high power laser beam directly to the marking head via a flexible metal sheathed fiber optic cable. Integrated into every F-Series head is our TeleView camera (with Cognex available as an upgrade). TeleView offers the ability to use a laser focus indicator, a viewfinder and optional 2D code read and grade. Coupling this feature with our Vari-Z 3D marking creates one of the most user friendly lasers in the industry.

The F-Series Laser Marking Systems offers a best in class 100,000 hour MTBF diode reliability with no water cooling requirements, and only single phase 110/220VAC power requirements.
