FOR IMMEDIATE RELEASE

TELESIS TECHNOLOGIES INTRODUCES THE Telescribe® SS3700/470 FOR CONTINUOUS LINE CHARACTERS IN METALS AND PLASTICS

Circleville, OH – September 10, 2012 -- Telesis Technologies Inc., a world leader in manufacturing standard and customized marking and engraving equipment systems, announces the new **TeleScribe® SS3700/470 marking system**. This new servo motor driven continuous scribe marker will be first presented at America's largest manufacturing show, IMTS 2012, the International Manufacturing Technology Show in Chicago, Illinois and is expected to be available for commercial sale starting Q4, 2012.

Telescribe SS3700 Marker

This servo motor driven scribe marker provides a significant increase in marking speeds over conventional stepper motor driven units while maintaining virtually silent operation. The TeleScribe® SS3700/470 is targeted largely at VIN (Vehicle Identification Number) applications many of which require marking speeds greater than 1 character/sec.

The TeleScribe® SS3700/470 is capable of marking 7mm high x 4mm pitch x 3mm wide characters at up to two characters per second in mild steel and is *about twice as fast* as our current stepper motor driven scribe systems. This system has a 50mm x 150mm marking window, and maintains the more compact form factor of the SC3500/470 system.

The scribe is interfaced to the included, stand alone TMC470 controller which features two serial ports, USB and Ethernet ports for connectivity.

TMC470 Marker Controller

Telesis Technologies Inc. is a world leader in manufacturing standard and customized permanent parts marking equipment and systems—including gas, solid state and fiber laser, mechanical PinStamp®, BenchMark® dot-peen systems and TeleScribe® scribe marking systems. Since 1971, Telesis has provided durable and accurate parts marking capabilities to companies the world over, from small shops to Fortune 100 manufacturing firms and governmental organizations. Telesis continues to be the most trusted brand in the parts-marking industry for over four decades. For more information on Telesis Technologies Inc., visit our web site at www.telesis.com and see us at IMTS2012, booth N6163 in Chicago, Illinois, September 10-15 2012.
