TELESIS is the leader in Product Identification and Processing Technologies. Our wide range of permanent, programmable, LASER, PINSTAMP® and TELESCRIBE® Marking Systems are fast and durable. They are relied on in thousands of manufacturing environments every day, throughout the world. All TELESIS systems — whether standard or custom engineered — are backed by a global network of knowledgeable Sales and Service Professionals.

TELESIS LASER MARKING SYSTEMS

TELESIS offers a full line of laser marking systems capable of satisfying even the most demanding laser marking applications for industry. These laser systems cover the spectrum of wavelengths enabling applications to a wide range of products, from medical devices and instruments to automotive components, delicate plastics, ceramics, glass and airframe components, and can mark virtually any material with text, bar codes, 2-D codes, logos and graphics. At the cutting edge of laser marking technology, TELESIS now offers optional “mark-on-the-fly” capable versions of all of our standard laser systems and the new Vari-Z series of 3-Axis laser markers for applications that require sophisticated marking on multiple surface levels or optimized rapid deep engraving.

Our E–Series diode-pumped, vanadate air-cooled lasers can operate in the harshest environments while maintaining peak performance for many thousands of hours of maintenance free operation with diode MTTF times up to 500,000 hours. In addition, they offer superior beam characteristics that make them uniquely capable among near IR lasers for many difficult applications, such as marking high resolution graphics, fine text or 2D codes as well as marking many heat sensitive materials and components. The versatile E-Series is a broad family including eight different systems. It starts with the powerful infrared EV40, capable of high speed, high quality, deep engraving of virtually any non-organic material, and includes the EV4GDS green laser, the best choice for many electronic components, medical applications, precious metals, as well as for a wide variety of plastics.

We pioneered the use of fiber lasers with our F-Series fiber lasers, and continue to be the leader in fiber laser marking technology. These markers offer low maintenance marking of almost all metals at an affordable price. The F-Series models include systems from 10W to power levels up to 50W for applications in which faster process speeds are required; and all models are available with the DS (Dual Safety Shutter) option.

The CO-Series of CO₂ lasers are ideal for marking organic materials such as glass, plexiglass, plastics and acrylics, wood, fiberboard, leather, vinyl and rubber. With three power levels to choose from, the CO-series is led by the powerful 60W CO60 laser marking system and followed with 30W and 10W systems with the fastest galvo systems in the industry.

Pattern design for any of our lasers is easy with the TELESIS designed MERLIN® II LS Software. This extremely user-friendly software runs on the Windows® 2000, Windows® XP, Windows Vista®, and Windows® 7 platforms. Our Automated Marking Interface (AMI) version of MERLIN® II LS addresses the need for a safe, easy operator interface. It provides the operator the capability to barcode scan to load patterns, load a picture of the part and fixture, and insert the marking data in the proper field all without the need of a keyboard. TELESIS offers full turnkey single source custom integrated or standard laser systems backed by our first-in-class service team and worldwide support by a network of representatives and distributors.
PIN MARKING SYSTEMS

Fully programmable PINSTAMP® Single and Multiple-Pin Marking Systems are based on TELE-SIS’ original, patented “Floating Pin” design. A pneumatically driven and returned metal pin permanently indents the marking surface with either dot matrix or continuous line characters — even logos, graphics or 2-D* Codes. Since the marking pin “floats” on constant return air pressure, surface irregularities up to ¼” are easily accommodated. And, no stress concentrations occur. Since the force of the mark is controlled by air pressure, product marking can be “customized” to suit most any application. TELESIS manufactures over 10 versatile PINSTAMP® Models. They are cost-effective in a wide range of stand-alone or on-line manufacturing situations.

TELESCRIBE® Marking Systems inscribe high quality, continuous line characters in materials from plastics to hardened steel — in virtual silence. Other Pin Marking Systems include the BENCHMARK® Series of low cost markers for stand-alone, benchtop and hand-held applications, and IDENTIPLATE®, which provides efficient, automated tag marking for a variety of industrial or consumer products.

QUALITY - ISO9001

At TELESIS, manufacturing management processes must comply with rigorous ISO Quality Standards. Product Testing in every phase of production ensures reliability throughout the life of your marking system.

CUSTOM ENGINEERED SOLUTIONS

TELESIS is the leader in custom engineered/factory integrated marking technology. Whether it’s a fully automated on-line application or a stand-alone manual workstation, TELESIS Applications Engineers will work with you to solve your parts handling and custom software needs.

They can integrate any of our standard marking products within your specific application. You can expect a responsive, cost-effective, quality design solution to meet your unique requirements.

To learn more – or discuss a Custom Engineered Marking System, call (800)654-5696 TODAY – or visit us at www.telesis.com.

All product descriptions subject to change without notice. Please refer to Product Specification Sheets or call the Applications Engineering Department at 800.654.5696 for current information.
TELESIS has over 40 years experience as the leading Automotive part marking solutions provider in the industry. TELESIS Technologies not only meets all AIAG requirements for marking, but we have been part of the work group responsible for creating the various stringent industry specifications. From single or multi pin, electric or pneumatic PINSTAMP® systems, to the state-of-the-art solid-state YVO₄, pulsed fiber and CO₂ laser marking systems, TELESIS continues its leading role as the key supplier to the automotive manufacturing sector. TELESIS has had VIN systems placed in factories over 25 years ago that are still operating today. The longevity of our systems are matched only by our ongoing service and support by our global corporation that is part of every marking system sold by TELESIS. Along with our PINSTAMP® systems, TELESIS prides itself on our robust laser systems like the TELESIS EV4GDS - Green Laser Marker; driving your overall ownership costs down with no down time or consumables. This laser marker has a patented robust mechanical and optical design that can operate in industrial environments where shock, vibration and dust often cause problems for other laser and conventional marking systems. With a vast background in engineered marking solutions including robotics, vision, 2D verification and conveyor systems, TELESIS offers full turnkey systems through its in-house engineering team to serve your every marking and traceability application. When it comes to automotive part marking solutions, TELESIS has been “The driver” for over 40 years!
ELECTRONICS
TELESIS Laser Marking Systems provide traceability for a wide range of electronic components and appliances. We offer a variety of 532nm and 1064nm YVO₄, pulsed fiber, and CO₂ to suit your specific requirements. From circuit boards and keypads to delicate micro chips and capacitors, high-speed laser marking is the answer for many manufacturers. The specialty laser marking solution for your electronics parts is the TELESIS EV4GDS Green Laser System. It is ideal for marking and processing difficult materials; colored plastics, acrylic and polymer materials and is perfectly positioned for use in the electronics, semiconductor packaging and highly reflective materials. The fiber-coupled diode-pumped solid-state (DPSS) green wavelength laser marking system features optimized laser beam and Q-switched pulse characteristics for applications that require high beam quality and stability. In addition, the TELESIS EV4GDS Green Laser Marking System offers extra power and speed for precision marking, and is an excellent choice for laser marking, scribing, trimming and other material processing applications. In addition, our material handling experts have years of experience, so they can work with you to develop the most effective solutions to your most sophisticated electronics part-marking challenges. We can provide material handling systems for standard component, high-volume manufacturing lines-- as well as for batch marking, and lower-volume parts lines.

FIREARMS AND DEFENSE
TELESIS Technologies has been the leader in robust, innovative, and dependable industrial permanent marking solutions for more than 40 years, and offers a wide range of PINSTAMP® and laser products to satisfy the unique identification requirements of the Defense and Firearms markets. Whether you need to meet the deep engraving requirements of CFR 478 AND 479, add a UID barcode to meet the Department of Defense UID specification MIL STD 130N, or simply want to permanently brand your product with your logo and company ID, TELESIS has the solution! Our broad family of laser marking systems provides the versatility to satisfy almost every marking surface processing technique required. Whether it’s marking polymers, composites, permanent color change in your product such as annealing metal, deep engraving in excess of 0.020” in steel, or anodized coating bleaching or removal; TELESIS Technologies can help. Our FQ, EV and CO families of lasers offer proven reliable marking solutions. These lasers are extremely dependable in high production manufacturing environments, with expected pump diode lifetimes that can exceed 500,000 hours. In addition to our laser marking systems, is our trusted world-famous, low stress PINSTAMP® marking systems. Low cost, durable, and available in a range of models, they are the choice in DPM applications. With text, logos, and 2-D codes marked to depths in excess of 0.020” in steel, programmable text heights and 2-D matrix capable, they offer a proven economical solution for your industry.
With our floating pin technology, TELESIS PINSTAMP® units are the better option for marking on uneven and rounded frame and barrel components; they are also available in a range of configurations for ease of use, operation, and integration, with electric or pneumatic options. Overseeing it all is our Merlin® visual design and control software, available for both LASER and PINSTAMP® product lines. This full function software allows the customer to design, integrate, and record messages and data easily, and reliably using a Window’s based PC. This software offers WYSIWYG (What You See Is What You Get) design capability with remote data import and export, log, and recording options (particularly helpful with UID and CFR recording requirements). Automatic Serialization, date codes, time codes, graphics, logos, 1 and 2-D barcodes including QR and UID configurations allow you to meet your CFR and UID requirements with ease. All of our products come standard with TELESIS’ renowned service and support, industry leading warranties, and the access to over 40 years of knowledge and experience in the marking industry with our custom Engineering and Applications Department. Our Process Lab is the largest in the US, and available to test your process, record the results and present a complete recommendation to you to insure the best result for your application. Always made in the USA, TELESIS is the company that quality Defense Suppliers and Firearms Manufacturers turn to for all their DPM (Direct Parts Marking) requirements per the following standard specifications:

- ATF/ Code of Federal Regulations 27 CFR 478.92 and 479.102
- MIL-STD-130N Department of Defense (UID / UII)
- ISO/IEC 15434
- ISO/IEC 16022
- SAE AS9132A

TELESIS is a GSA supplier; #GS-25F-0042R

The TELESIS name has a 40 year proven track record of providing turnkey solutions to the Heavy Equipment Manufacturing Industry. Our history involves Fortune 500 companies producing everything from earth moving machines to heavy truck frames. Our wide assortment of products affords us the opportunity to satisfy virtually all identification needs. PINSTAMP® and TELESCRIBE® products are designed to provide the deepest of VIN (vehicle identification number) marking on a variety of components. Engines, transmissions, components and structural frames are just a few of the parts we have marked. Each marker has been designed to provide identification, that not only survives secondary processing (e.g. heat treating, blasting, coating, etc.), but survives the life cycle of the part in the harshest of environments. Integrated laser markers, vision systems and databases have been successfully implemented into a wide range of production line operations to control manufacturing and data collection processes. By providing high contrast marks on a variety of components and tracking them through the entire manufacturing operation, TELESIS Technologies is able to provide extremely valuable information to manufacturing engineering and quality controls. Implementation of this type of turnkey system at a world renowned heavy equipment supplier has resulted in a cost savings of dollars in recalls.
INDUSTRIAL
Since 1982 we have been the supplier of choice for Industrial Identification & Traceability Equipment. Companies such as Ford, Chrysler, General Motors, Volvo, Delco, GE Aerospace, Boeing, Pratt & Whitney, Nordson and AT&T trust TELESIS to provide quality solutions within their production processes. Our product line has been developed by meeting a wide range of manufacturing demands. Today, TELESIS offers the broadest standard selection of permanent identification and material processing systems available in the world. Whether your products are plastic or delicate medical instruments, large diesel engines or tiny 1/8" bolts, you'll benefit from our extensive design and product integration experience.

OIL & ENERGY
For over 40 years, TELESIS Technologies has been supplying permanent direct part marking solutions for the energy Industry. Our robust equipment offers a heavy duty solution to the harsh production environments of the component manufacturers to the Oil and Energy industries. Dot matrix indent marking is a proven method of marking text and 2-D matrix barcodes onto the steel pipe and tube components used in the oil supply and refining markets. Capable of indenting greater than 0.10" depth into steel, and with character sizes up to 2.0" in height, makes this technology perfect for customers needing a durable, long lasting mark capable of surviving the outdoor and underground environments industry products typically find themselves in. In addition to our dot peen products, TELESIS manufactures the widest array of galvo steered marking laser systems in the industry. With the TELESIS' PC based Merlin® visual design software, they offer a complete solution for your marking requirements. All of TELESIS equipment offers the advantage of TELESIS' 24 hour Technical support, with on-site service and support via TELESIS trained technicians for worry free operation. Custom installations and turn-key applications are welcome and supported by our Custom Engineered Solutions Group.

MEDICAL
At TELESIS, we have more than 40 years experience in producing turn-key marking and traceability solutions to the world's largest and most respected manufacturing companies in the world. As the needs of medical device manufacturers to become more stringent, TELESIS has proven our commitment to serving up solutions for medical device industry by partnering with our clients by focusing on their needs for medical market specific high quality, close tolerance workstations along with state-of-the-art laser systems. Through our investments in laser technology and innovative software packages, along with our process expertise and material handling know-how, we have developed a portfolio of capabilities that is second to none. Our large installed base of laser marking systems demonstrates the focus TELESIS has in the medical device marketplace. Exceptional laser marking solutions, standardized to simplify the medical device manufacturing process.
MEDICAL (CONTINUED)

TELESIS has developed a broad line of laser sources that is designed specifically for medical device marking. This versatility allows us to mark virtually any material whether the need is corrosion-proof annealing, deep engraving, and high contrast 2D matrix codes to meet HIBCC standards, “color” marking on SS and titanium, or virtually any type of traceability on any material. Medical device corrosion resistant marking on implants and surgical instruments.

Are you concerned with achieving corrosion resistance and surviving passivation with your laser marking of critical surgical implants? Are you having problems meeting the tight laser marked graduation tolerance specifications and repeatability on those medical instruments? Does your medical device laser marking application require the flexibility that only robotics can deliver or does a closed-loop XY with Theta answer as the best solution? Isn’t it time you own a laser with a software solution that offers an operator interface with test mark power adjust, barcode scan for pattern load and variable text, and a log function to track the critical FDA data for marking, traceability, and validation? TELESIS offers a Medical Manufacturing Standards “best fit” laser workstation and material handling solution with our full in-house engineering staff to customize to your specific application when needed!

CODING AND MARKING

TELESIS Technologies is your solution provider for your packaging applications requiring permanent laser marking on labels, product, packages and vessels. Our years of experience in pharmaceutical, cosmetic, food industries and others serve as a vast knowledge base to answer all your packaging needs. We offer a full array of “First-In-Class” laser solutions for marking/coding on everything packaging, and every laser is completely air-cooled. No one has more experience in marking/coding and traceability on static or “Mark-On-The-Fly” applications. With thousands of marking systems installed in packaging, automotive, medical and aerospace applications around the world, -- static or dynamic at rates of over 1,000 feet per minute, and 1300 characters-per-second, TELESIS Technologies is the expert! We can provide flexible solutions, with custom or standard lasers to fit your application, and an expert team with packaging backgrounds second to none.

CUSTOM ENGINEERED SOLUTIONS

TELESIS is the leader in custom engineered/factory integrated marking technology. Whether it’s a fully automated on-line application or a stand-alone manual workstation with custom software needs, TELESIS Applications Engineers will work with you to solve your parts handling and software integration needs, and tailor any of our standard marking products to match your specific application. You can expect a responsive, cost-effective, quality design solution to meet your unique requirements.
## Table of Contents

**Service and Support** ........................................................................................................................................... Page 11

### LASER MARKING SYSTEMS

**EV40 Diode-Pumped Solid State Lasers** ............................................................................................................ Page 12
Outstanding pulse energies makes this laser ideally suited to high throughput deep marking and engraving applications in a completely air cooled system package.

**EV25DS Diode-Pumped Solid State Lasers** ..................................................................................................... Page 13
This industrial grade vanadate laser provides higher powers and superior beam quality, resulting in smaller spot sizes and longer working distances for your laser applications.

**EV15DS and EV10DS Diode-Pumped Solid State Lasers** ............................................................................. Page 14
Excellent beam quality makes these lasers uniquely capable among near IR lasers for marking of high resolution graphics, fine text, or 2-D codes.

**EVCDS Diode-Pumped Solid State Lasers** ....................................................................................................... Page 15
The EVCDS extends the capabilities and features of the EVC with the addition of the TELESIS Dual Shutter Sensor and the advanced E10 Series laser controller with optional embedded PC capability.

**EVC Diode-Pumped Solid State Lasers** ............................................................................................................ Page 16
These compact diode pumped lasers set a new benchmark in reliability, low cost of ownership and produce efficient short laser pulses.

**EV4GDS Green Laser** ......................................................................................................................................... Page 17
This fiber-coupled, diode-pumped, solid state, green wavelength laser marking system provides laser beam and Q-switched pulse characteristics optimized for applications that require high beam quality and stability.

**EY6DS Diode-Pumped YAG Solid State Lasers** .............................................................................................. Page 18
These compact Diode-Pumped, Solid State Laser Marking Systems are extremely reliable, low cost alternatives to other laser designs.

**F-Series FIBER LASERS — FQ50, FQ30, FQ20 and FQ10** ............................................................................ Pages 19
Select the F-SERIES FQ50 and FQ30 when higher power or faster process speeds are required or the FQ20 or FQ10 for low to medium speed applications. Additionally, all F-Series fiber lasers offer the long-term safeguard of a built-in optical isolator and optional Dual Shutter Sensors.

**Vari-Z Series 3 Axis Lasers** .......................................................................................................................... Page 20
VARI-Z SERIES of solid state laser marking systems are perfectly suited for advanced applications that require the processing of non-flat parts, or the marking of multiple or uneven surfaces. The 3-Axis beam deflection systems enable processing in three dimensions.

**CO-Series CO₂ Lasers** ...................................................................................................................................... Pages 21-22
Available in 60, 30, and 10 watt configurations, CO-Series CO₂ Lasers are the choice for marking substrates like wood, glass, ceramics and fabrics.

**MERLIN® II LS Laser Software** ...................................................................................................................... Page 23
Designed to drive all core TELESIS Laser Products. Simply highlight, click and mark!

**LASER MARKER ENCLOSURES, ACCESSORIES AND SYSTEM INTEGRATION** ............................................ Page 24-25
TELESIS offers a wide range of laser mark enclosures and other system accessories.

**LASER MARKING SYSTEM SELECTION GUIDE** ................................................................................................. Pages 26-28
PINSTAMP® and TeleScribe® MARKING SYSTEMS

TMC470 Marking System Controller ................................................................................................................. Page 29
The TMC470 is a truly state-of-the-art, compact, self-contained controller. Available with all TELESIS PINSTAMP® and TeleScribe® marking heads.

MERLIN® III Visual Design Software .................................................................................................................. Page 29
TELESIS’ new WIN 32 Merlin® III Visual Design Software makes pattern design quick and intuitive. “WYSIWYG” (what you see is what you get) displays a to-scale image of the pattern as it’s created. Just “click & drag” for immediate adjustments to field size, location or orientation.

TMP7000/470 PINSTAMP® Marking System ........................................................................................................ Page 30
The TMP7000/470 is a powerful, heavy duty marking system for deep marking applications. This single pin marker is capable of marking characters up to .025” (.63mm) deep on mild steel.

TMP6100/470 PINSTAMP® Marking System ..................................................................................................... Page 31
The Single Pin TMP6100 is the most versatile PINSTAMP® Marking Head. It is easily integrated into either on or off-line applications. Since the marking pin can be positioned anywhere in the generous 6” x 12” (152 x 304mm) marking window, the TMP6100 can mark any character height or style, or number of lines desired. Its robotic design allows clear access to the marking window for loading and unloading of parts.

TMP3200/470 PINSTAMP® Marking System ..................................................................................................... Page 32
The TMP3200/470 is a rugged, cost effective utility marker for on-line and off-line high speed marking applications. Its low-maintenance design features a 4” x 6” (100 x 150mm) marking window for multi-line text, and marking speeds up to six characters-per-second.

TMP1700/470 PINSTAMP® Marking System ................................................................................................. Page 33
The TMP1700/470 is the lowest cost PINSTAMP® Marking System. The rugged Single Pin TMP1700 marking head features a compact, 1-1/2” x 2-1/2” (38.1 x 63.5mm) window, and marking speeds up to six characters per second. It’s an excellent choice for many factory-automated or on-line processes. When combined with optional mounting post and base, the TMP1700 is cost-effective in off-line marking applications, too.

TMP6100/470EAS Electric AutoSense PINSTAMP® Marking System ............................................................ Page 34

It’s an excellent choice for many factory-automated or on-line processes. When combined with optional mounting post and base, the TMP1700 is cost-effective in off-line marking applications, too.

TMP4500/470E PINSTAMP® Marking System ................................................................................................. Page 37
The TMP4500/470E is a hand-held electric pin marker perfect for portable applications requiring deep marking.

TMP4210/470 PINSTAMP® Marking System ................................................................................................. Page 38
The TMP4210/470 is an extremely lightweight, hand-held, single pin marker satisfying a wide range of portable marking applications. Its robust rack-and-pinion design and compact envelope also make it the right choice for many high production, on-line applications.
TMM7200 PINSTAMP® Marking System

The TMM7200 is an extremely heavy duty marking system. It is the right choice for deep penetration marking of large characters. The flexible TMM7200 can be configured with up to 21 marking pins to print 21 characters in 1.5 seconds.

TMM5400 PINSTAMP® Marking System

With eight pins marking simultaneously, the TMM5400 is the fastest dot peen marker available. It can mark up to 16 characters-per-second in soft plastics or hardened steel. Choose from a variety of marking pins and cartridges to optimize window size and cycle time combinations.

TMM5100 PINSTAMP® Marking System

With up to six pins marking simultaneously, the TMM5100/470 Multiple Pin Marking system can mark up to six characters-per-second. Its lightweight, compact design and minimal footprint make it ideal for either automated or hand-held operations. A variety of pin cartridges are available for optimal character size/depth, cycle times and marking window areas.

TMM4250/470 PINSTAMP® Marking System

The TMM4250/470 Multiple Pin Marking System can mark up to eight characters-per-second. A NEMA 12 (IP55) enclosure with industrial grade, protective rubber "boot" makes it highly resistant to both solid and liquid contaminants. The TMM4250 features an extremely compact envelope. It can be integrated easily within a wide range of manufacturing settings.

TMM4215/470 PINSTAMP® Marking System

Based on the TMM4200/470 design, the TMM4215/470 provides a marking window twice the size of the TMM4200/470.

TMM4200/470 PINSTAMP® Marking System

The unique TMM4200 Multiple Pin Marking Head can mark up to eight characters-per-second at depths to .013˝ (.33mm). Weighing 4.5 pounds, its compact, hand-tool like design with pistol-grip handle makes the TMM4200 the ultimate hand held permanent marker.

SS3700/470 TeleScribe® Marking Systems

This state-of-the art scribe marker is SERVO-DRIVEN for the greatest speed-depth combination of high quality, continuous line characters in most metals and plastics. It is well suited for a wide range of automated on-line and stand-alone bench top applications.

SC5000/470 and SC3500/470 TeleScribe® Marking Systems

For virtually silent marking, the economically priced SC3500/470 features a 4” x 6”(100 x 150mm) marking window. The powerful, heavy duty SC5000/470, with a 2.5” x 7.5” (63.5 x 190.5mm) marking window is particularly well suited for VIN marking applications.

BenchMark®460 Hand-Held Marking System

The BenchMark®460 is a fully programmable, cost effective alternative to old-fashioned permanent marking techniques for parts too large or heavy to be carried to a marking station.

BenchMark®320 and 200 Benchtop Marking Systems

These are extremely affordable benchtop markers equipped with an electromechanical marking pin.

2-D and UID Code Marking and Verification

2-D and UID Code applications, where accurately marked codes are the key to readability.

Pin Marker Product Accessories and System Intergration

Choose from a variety of options and customized solutions to enhance your TELESIS Marking System.

Pneumatic Impact Pin Selection Guide

Pin Marking System Selection Guide

Pages 55 – 58
All of our systems — standard and custom — are designed and built to your specifications at our 46,000 square foot (4087 square meter) facility located in Circleville, Ohio. We maintain state-of-the-art manufacturing tools for all of the mechanical, electrical and software functions needed to support your marking system. TELESIS also maintains Sales and Distribution Offices in The Netherlands, Germany, England, and China.

Customer Service
At TELESIS, Customers come First. Our Customer Support Specialists are fully trained to help with questions on pricing, product capabilities, accessories, spare parts and availability. They provide timely up-dates on the status of your order. Call us at (800)654-5696 for the answers to any of your questions!

Technical Service
We back our customers with support and service for every system we build world-wide. This includes on-site installation and start-up by our experienced Field Service Engineers. They’ll even train your operating personnel — further assurance that your TELESIS Marking System will perform dependably.

Have a technical question or concern? TELESIS Service Technicians are available 24 hours a day — every day — to help you. Often, they can troubleshoot and fix a problem over the phone, saving you time and money. Call our Technical Service Department at (800)867-8670 or e-mail a TELESIS Service Technician at: technical_services@telesistech.com.

Training
TELESIS’ commitment to customers is evident in our Training Facility. It features classroom-oriented and hands-on product training by experienced instructors. Our 3,000 square foot facility gives us the flexibility to easily accommodate up to 40 people in a classroom setting. Smaller groups use product work-stations for a very effective, individual learning experience. Customized on-site training for the customer can be also be developed as needed to meet the customers needs.

Our Warranty and Guarantee
Every TELESIS Marking System carries a complete Parts and Service Warranty. During this time, we can send replacement parts, free of charge, overnight in the continental United States. Plus, we have component exchange programs for reconditioned equipment can reduce downtime. Extended Service warranties are available for all TELESIS Marking Equipment. Contact your TELESIS Representative or our Customer Service Department for details.

At TELESIS, we’re dedicated to support you for the life of your Marking System. We’re with you 100% of the way.
The EV40 is a high throughput laser marker featuring a Q-switched Nd:YVO₄ diode pumped, air-cooled laser design with high speed digital galvo scanners. This laser provides high quality laser beam characteristics including a long focal tolerance combined with up to 2mJ/pulse energies and high average powers at 1064nm, allowing these systems to achieve high-speed, rapid deep marking of metals or composite materials on flat and curved surfaces and offers the user best-in-class reliability with a low cost of ownership. In addition, the integrated proprietary Merlin®II LS graphical laser software and optimized electronics make these systems the best solution for many high speed marking on the fly (MOTF*) applications. The robust mechanical and optical design allows these lasers to operate without any chiller in an industrial environment where shock, vibration, and dust are a concern while maintaining stable output power and an expected diode MTTF of 75,000 hours. The small footprint allows for easy integration into manual off-line and automated on-line configurations, making it ideal for a wide range of industrial marking applications.

### LASER MARKER SPECIFICATIONS

- **Compliance**: CDRH
- **Wavelength**: 1,064nm
- **Laser Type**: Fiber-coupled diode end-pumped Q-switched Nd:YVO₄ laser
- **Laser Beam Mode**: TEM₀₀
- **Positioning**: Visible Red Diode Light
- **Optical Fiber Length**: 1.75 meters (5.74 feet) standard
- **Mounting Weight**: approx. 20.0kg (44.2lbs.)
- **Marking head dimensions**: 22.4(W) x 23.0(h) x 74.3cm(L) (8.8˝ x 9.1˝ x 29.3˝)
- **Controller dimensions**: 43.9(W) x 21.1(H) x 43.9cm(L) (17.3” x 8.3” x 17.3”)
- **Controller Weight**: 17.3kg (38.0lbs.)
- **Input Power**: 115/230VAC 50/60hz
- **System Power Consumption**: < 950W
- **Cooling**: Air Cooled, active thermo-electric (no water cooling required)
- **Operating Temperature Range**: 18° to 35°C (65° to 95°F)
- **Humidity**: 10% to 85% Non-condensing

Engraved approximately 4mm deep in aluminum
E-Series - EV25DS
Diode-Pumped Solid State Laser

At the heart of the EV25DS marking system is our air cooled, high power, industrial grade 25W, diode-pumped, solid-state vanadate laser. It is designed to operate in the harshest of environments. With a pump diode MTTF of 250,000 hours, it will be able to maintain a peak performance for many thousands of hours of maintenance-free operation. The EV25DS offers distinct advantages over fiber lasers and other solid state lasers due to its superior beam quality, providing smaller focused spot sizes and a longer working depth of field than competing lasers. The EV25DS provides the strength to tackle metals such as stainless steel, cobalt, and titanium, as well as provide the high marking speeds required for marking-on-the-fly (MOTF). It also has the ability to do fine detail work, trimming, edge heat treating, and even marking delicate materials like plastics, foils, and labels. It produces superb annealed marks that stand up to the harshest of tests, high resolution 2D codes, and can produce unique color marks on various metals.

LASER MARKER SPECIFICATIONS

Compliance.............................................................CDRH, CE
Wavelength.................................................................1,064nm
Laser Type...................... Fiber-coupled diode end-pumped Q-switched Nd:YVO4 laser

DATA MATRIX™ 2-D Code Marking Capability
Meets all Department of Defense UID Requirements
The TELESIS EV15DS and EV10SDS markers are based on advanced Q-Switched, fiber-coupled diode end-pumped Nd:YVO₄ laser technology. The outstanding beam quality of these lasers makes them superior to all other markers of equivalent power for high resolution and high speed marking. Additionally, the shorter pulse widths and high peak powers of this marker makes it the preferred choice for challenging marking applications on silicon or heat sensitive materials such as plastics or thin foils. The smaller spot size and extended depth of focus allows these lasers to mark much more highly irregular or curved surfaces than fiber lasers. They are air-cooled and an excellent choice for high speed Marking-On-the-Fly applications as well. With an expected pump diode MTTF of over 250,000 hours for the EV15DS and 500,000 hours for the EV10SDS, system down time is dramatically reduced. Diode replacement can be completed quickly and the fiber coupled diode design eliminates the need to re-align the laser marker. The marker’s modular design, housing the diode in the laser controller, eliminates a large heat source from the laser insuring maximum stability as well as the need for water cooling.

The TELESIS EVCDS marker is an extremely cost effective DPSS laser based on a proven advanced Q-Switched, fiber-coupled diode end-pumped Nd:YVO₄ laser platform for applications requiring high beam quality and stability. It features a dual sensor shutter safety system and its exceptional power stability at all power levels makes the EVCDS an ideal choice for engraving, annealed marking, or high speed marking on delicate and heat sensitive electronic components, thin foils and medical instruments. The EVCDS is completely air cooled with a very compact, easily integrated package requiring very little maintenance. With an expected lifetime for the pump diode of over 500,000 hours, down time is dramatically reduced. Because of the modular fiber coupled design, diode replacement can be completed quickly with no need to realign the laser. The compact footprint of the system allows for the easy integration into both manual off-line and automated in-line applications with Marking-On-The-Fly (MOTF) support for high volume applications.*

DATA MATRIX™ 2-D Code Marking Capability
Meets all Department of Defense UID Requirements
The EV4GDS marker is based on an advanced Q-switched, fiber-coupled, diode end-pumped and frequency doubled (green wavelength) Nd: YVO₄ laser. Its laser beam and Q-switched pulse characteristics are optimized for applications that require high beam quality and stability. The 532nm wavelength of the EV4G offers extra power and speed for precision marking, scribing, trimming and other material processing that is not well suited for near IR or CO₂ wavelength lasers. The robust mechanical and optical design of the EV4GDS enables operation in industrial environments where shock, vibration and dust are a concern. The EV4GDS is a completely air-cooled, very compact, easily integrated package requiring very little maintenance. With an expected lifetime for the pump diode of over 250,000 hours, downtime is dramatically reduced. Because of the modular fiber coupled design, diode replacement can be completed quickly with no need to re-align the laser.

F-Series - FQ50, FQ30, FQ20 and FQ10
Fiber Laser Marking Systems

The TELESIS FQ50 is the latest laser in a family of maintenance free Q-switched ytterbium fiber lasers specifically designed for marking applications with power levels from 10-50W. These lasers deliver a high power laser beam directly to the marking head via a flexible metal sheathed fiber optic cable. The fiber based optical design and rugged mechanical design allows these markers to operate in an industrial environment where shock, vibration and dust are a concern. The F-Series fiber marker’s unique design allows the overall package to be very small and modular for ease of integration into a variety of industrial applications. The F-Series Laser Marking Systems offers a best in class 100,000 hour MTBF diode reliability with no water cooling requirements, and only single phase 110/220VAC power requirements.

The innovative, compact and flexible VARI-Z Series of solid state laser marking systems are perfectly suited for advanced applications that require the processing of non-flat parts, multiple or uneven surfaces. The 3-Axis beam deflection systems enable processing in three dimensions. The focusing optic is galvo motor-driven, enabling it to quickly generate continuously variable stepwise image field sizes and the longest standard working distance available in the industry up to a total focused depth of 78mm. This allows the user to change the working distance, field and spot size with the same galvo head, all under software control. With 3-Axis Marking, you can maintain a consistent system focus and fluence throughout the working volume to achieve deeper engraving as well as faster material removal. This functionality can be added to both the EV series and FQ series of laser markers.

**OPTIONS**

- Lens options of 163mm and 254mm
- 3 position galvo head can be configured at 0°, 90° or 180°
- Visible Red Aiming Diode
- Integrated PC system controller
- CDRH Class 1 enclosures
- MOTF (Marking On The Fly) encoders and part presence sensor kit
- Additional Axis Automation for X, Y, Z and rotation
- Fume/Dust Extractor
- Design, build and integration of custom engineered solutions available

**DATA MATRIX™ 2-D Code Marking Capability**

Meets all Department of Defense UID Requirements
The TELESIS CO-Series Laser Markers, available with standard power levels at 60W and 10W and are excellent choices for high duty cycle applications on plastic, rubber, wood, paper, anodized metal and label marking applications. They are perfect for “Marking-on-the-Fly” as well as stationary marking. Their RF-excited CO₂ tube assures a long life cycle as well with virtually maintenance-free operation. Due to their compact size and modular construction, the CO-Series markers can go almost any place they are needed on the plant floor.

The TELESIS CO-Series AP Laser Markers, available in two different power levels, the 10W Model CO10AP and the 30W Model CO30AP are excellent choices for many plastic, fiberboard, anodized metal and label marking applications. They are perfect for “Marking-on-the Fly” as well as stationary marking. A 10” USB LCD touch screen controller is available for embedded applications. The unique 3 position rotatable scan heads can be configured to easily integrate the laser into your application (also available in a linear “straight shooter” marking configuration) and the RF-excited CO2 tube assures a long life cycle as well with virtually maintenance-free operation. Due to their compact size and modular construction, the CO-Series AP markers can go almost any place they are needed on the plant floor.

STANDARD LENS CONFIGURATIONS

FOCAL LENGTH       MARKING FIELD
75mm..................50mm X 50mm (1.97” X 1.97”)
100mm...............70mm X 70mm (2.76” X 2.76”)
150mm........100mm X 100mm (3.94” X 3.94”)
200mm..........140mm X 140mm (5.51” X 5.51”)

Other lens configurations are available

MARKING SPEED2

• Up to 152m/minute (500ft./minute) line speed for “Mark-on-the-fly” applications
• Up to 1300 characters/second

SOFTWARE

Software.............................................MERLIN® II LS (see page 23)
Operating System.........................Windows® 2000, WindowsXP, Windows Vista™, Windows® 7, or Windows® 8
with Optional Embedded, Desktop or Rackmount PC
Communication Interface.......................Serial, TCP/IP, I/O

1 Extended operational ranges for less than 100% duty cycle. The optimized cooling design provides the best performance at high temperatures available in the market for CO2 markers.

2 Character marking speeds and production line speeds depend on material, character size and the desired marking quality.
The powerful Merlin® II LS Visual Design Software package is capable of driving any of the core TELESIS Laser Products. Each system is shipped with a fully functioning version of the Software (on CD), that allows for off-line program development.

**TELESIS LASER SOFTWARE FEATURES:**

- Specially Designed by TELESIS – for 32 bit and 64 bit Windows® operating systems, compatible with Windows 2000, Windows XP, Windows Vista™, Windows® 7 or Windows® 8
- Import a wide range of Graphic Formats including DXF from AutoCAD™, Adobe Illustrator, WINDOWS® Bitmaps, True Type Fonts as Vector or Raster Files.
- Supports 4 Axis Movement (X,Y, Z & Rotary)
- Supports marking-on-the-fly (MOTF)
- Highlight, click and mark!

**COMPUTER REQUIREMENTS:**

- Pentium® III with RAM as recommended per operating system
- 2 GB Hard Disk Drive, CD-ROM drive
- SVGA Video, Sound Card
- SVGA Monitor, Mouse and Keyboard
- Additional application dependent requirements may include
  - one RS-232 Serial Port, two USB Ports,
  - two Ethernet Ports, two Half-length PCI Slots

**OPTIONAL AUTOMATED MARKING INTERFACE (AMI) VERSION:**

Our AMI version of Merlin II LS addresses the need for a safe, easy operator interface that allows barcode scanning to load patterns, load a picture of the part and fixture, and insert the marking data in the proper field all without the need of a keyboard - virtually mistake free.
TELESIS offers a wide variety of commercially available Class 1 and Class 4 laser marker enclosure styles and sizes. When the situation demands it, our experienced custom engineering staff can design one to fit the specific needs of your application.

TELESIS can provide a complete solution to your laser marking requirements with parts handling accessories such as X/Y tables, rotary fixtures, rotary tables and manual and automated Z-axis.
ProStation 48 and 36 CLASS 1 Industrial Laser Workstations

CLASS 1 LASER ENCLOSURE FEATURING:
- Attractive, rugged fabricated sheet metal design
- Transverse laser head mounting for convenient loading and unloading
- Extruded aluminum floor for convenient attachment of work piece fixturing and parts handling accessories
- Fume extraction port
- Interior work lamp and door interlock
- Mounted keyboard and monitor arm
- Tower computer with 19” flat panel monitor, keyboard and mouse
- Heavy duty dual rail manually adjusted laser head mounting post

AVAILABLE OPTIONS INCLUDE:
- Programmable Z-Axis laser head mounting post with 2-Axis stepper controller
- Industrial rack mount computer system
- Matching industrial base with equipment shelves and casters
- Machine safety lighting tower and machine I/O interface kits
- Fume extraction systems
- 115/230VAC and 50/60Hz versions

ProStation 24 CLASS 1 Reduced Footprint Industrial Laser Workstations

CLASS 1 LASER ENCLOSURE FEATURING:
- Same attractive, rugged fabricated sheet metal design with almost a 50% smaller footprint
- Transverse laser head mounting for convenient loading and unloading
- Extruded aluminum floor for convenient attachment of work piece fixturing and parts handling accessories
- Fume extraction port
- Interior work lamp and door interlock
- Mounted keyboard and monitor arm
- Tower computer with 19” flat panel monitor, keyboard and mouse
- Heavy duty dual rail manually adjusted laser head mounting post

Available options are identical to those available for all ProStations

TablePro CLASS 1 Table Top Industrial Laser Workstations

CLASS 1 LASER ENCLOSURE FEATURING:
- Attractive, rugged metal design in a compact 20” x 28” x 20” (LxWxH) envelope
- Top mounted laser head with external manual hand crank access
- Workstation viewing window
- Fume extraction port
- Interior work lamp and door interlock

Consult the factory for available options to best fit your application

DrawerPro CLASS 1 Table Top Industrial Laser Workstations

CLASS 1 LASER ENCLOSURE FEATURING:
- Interlocked sliding drawer assembly for convenient part loading
- Attractive, small footprint rugged metal design
- Large fixture area for fixed focus applications
- Workstation viewing window
- Fume extraction port
- Interior work lamp and interlocked drawer door

Consult the factory for available options to best fit your application

For all applications, it is highly recommended that samples be sent to TELESIS for qualification and testing purposes.
TMC470 Marking System Controller

FEATURES
• Fully self-contained – no PC required
• Easy-to-use menu design for pattern design and access
• Ethernet port for TCP/IP communications
• Durable membrane keyboard
• Pattern backup via USB port
• Stores up to 200 marking patterns locally
• One RS232/485 and one RS232 serial port and discrete I/O capabilities with spare I/O available for customer-specific needs
• Optional internal board to control third and fourth axis (Z and rotary) – no separate driver required
• Optional panel-mount kit for panel mounting in NEMA/IP rated enclosures
• Operates on 100 – 130 VAC or 200 – 250 VAC, 50 – 60 Hz power
• Conforms to all European Community (CE) norms

Marking “tools” available include text (at any angle), arc text, rectangles, circles, ellipses and lines. Multiple fields can be grouped and saved as a block to form a logo, or import logos via DXF CAD files.

Non-printable fields clearly show the graphical representation of the part being marked. Use the convenient, “GO TO” command to avoid obstacles within the marking window.

Merlin® III VISUAL DESIGN SOFTWARE

Offered as an optional accessory to a number of TMC470- based Pinstamp® Marking Systems, TELESIS’ powerful Merlin®III Visual Design Software with its state-of-the-art graphical user interface, makes marking pattern design quick and easy.

“WYSIWYG” (what you see is what you get) interface provides a to-scale image of the pattern as it’s created. Just “click & drag” for immediate adjustment to field size, location or orientation. Pattern Wizard Mode makes simple pattern design a snap even for the computer novice.
The PINSTAMP® TMP7000/470 is a robust single pin marker targeted at applications requiring extremely deep penetration marking. Its 4” x 6” (100mm x 150mm) marking window is ample for a wide range of applications and its TMC470 controller allows it to be easily integrated into most automated applications.

**FEATURES**

- Great for marking large characters and/or rough surfaces
- Large 4” x 6” (100mm x 150mm) marking window
- Marks up to 0.025” (0.63mm) deep in mild steel
- Self-contained, state-of-the-art TMC470 controller features two serial ports, USB and Ethernet ports (see page 29)
- Automatically generates serial numbers, date, time and shift codes
- Marks a wide range of materials from soft plastics up to hardened steel
- Stores up to 200 marking patterns

**OPTIONAL ACCESSORIES**

- Panel-mount and IP/NEMA-Rated controller options
- Marking head support tooling and balancers
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- PC-Based Pattern Back-up Utility available FREE from www.telesis.com

“We recommend TELESIS hardware to our clients because we believe it is the best marking equipment available. The success of our software business depends on high quality 2D Data Matrix™ dot peen marks and TELESIS consistently delivers quality marks – every day – every time!”

Chuck Stewart, Stewart Technologies Inc.

“Compact Self-Contained TMC470 Controller — no PC required.”

QR Code Web Page Product Link
DATA MATRIX™ 2-D Code Marking Capability
Meets all Department of Defense UID Requirements and other industry standards
The TMP6100 is the most versatile PINSTAMP® marking head. It is easily integrated into either on or off-line applications. Since the marking pin can be positioned anywhere in the generous 6” x 12” (152mm x 304mm) marking window, the TMP6100 can mark any character height, style or number of lines desired. Its robotic design allows clear access to the marking window for loading and unloading of parts.

“The TELESIS Model 6100/470 is a top quality product. They run 6 days a week, 10 hours a day, all day long, and they are ‘bullet-proof’. I’d recommend the TELESIS dot peen (Pinstamp) to anybody who needs that type of product marker. It is one of the best machines that we have.”

Bud Nelson, Secondary Manager, Acutec Precision Machining

FEATURES
- Large 6” x 12” (152mm x 304mm) marking window
- Unique rigid positioning drive features robotic technology
- Marks a wide range of materials from soft plastics to hardened steel — up to Rc60
- Dot density up to 200 dots-per-inch (79 dots-per-centimeter)
- Choice of interchangeable marking pin types for depths from 0.001” – 0.018” (0.02mm – 0.45mm)
- Pin travel accommodates surface irregularities to 0.25” (6mm)
- Compact, self-contained TMC470 Controller with integral display and keyboard – no PC required (see page 29)
- RS232 or TCP/IP Host interface to download text to individual fields or call up entire patterns
- Automatically generates serial numbers, time, date and shift codes
- Easily interfaced to PLCs (Programmable Logic Controllers)
- Pattern backup via USB port
- Stores up to 200 marking patterns (files)

OPTIONS AND ACCESSORIES
- Rotary fixtures for marking circumferences of cylindrical parts
- Marking head mounting posts, including programmable Z-axis version
- Logo/Font design Software Package for design of custom fonts or simple logos
- Powerful Windows-based Merlin® III software (see page 29)
- Electric Pin Version Available

COMPACT SELF-CONTAINED TMC470 CONTROLLER

OPTIONS AND ACCESSORIES
- Rotary fixtures for marking circumferences of cylindrical parts
- Marking head mounting posts, including programmable Z-axis version
- Logo/Font design Software Package for design of custom fonts or simple logos
- Powerful Windows-based Merlin® III software (see page 29)
- Electric Pin Version Available
The PINSTAMP® TMP3200/470 Single Pin Marking System features a large 4” x 6” (100mm x 150mm) marking window, and marking speeds up to six characters-per-second. Well suited for both bench top and factory-automated applications, its simple, yet robust belt-driven dual rail, X/Y platform yields high quality characters and low maintenance operation.

**FEATURES**
- 4” x 6” (100mm x 150mm) marking window
- Belt-driven, dual rail X/Y mechanism with superior wear characteristics
- Patented floating pin technology accommodates surface irregularities of up to 0.25” (6mm)
- Marks a wide range of materials from soft plastics to hardened steel — up to Rc60
- Choice of pin sizes for marking depths from 0.001” - 0.018” (0.03 mm - 0.45 mm)
- Self-contained, state-of-the-art TMC470 controller features two serial ports, USB port and Ethernet port (see page 29)
- Automatically generates serial numbers, date, time and shift codes
- Stores up to 200 marking patterns
- Easily interfaced to PLCs (Programmable Logic Controllers) and Host Computers
- Dot density up to 200 dots-per-inch (79 dots-per-centimeter)

**OPTIONAL ACCESSORIES**
- Rotary fixtures for marking circumferences of cylindrical parts
- Marking head mounting post including programmable Z-axis version
- Panel-mount and IP/NEMA-Rated Controllers
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- Powerful Windows based Merlin® III software available (see page 29)

A protective shutter assembly shields the TMP3200 marking head from liquid and solid contaminants.

Compact Self-Contained TMC470 Controller — no PC required.
The TMP1700/470 is the lowest cost PINSTAMP® marking system. The rugged TMP1700 marking head features a compact, 1-1/2” x 2-1/2” (38.1mm x 63.5mm) window, and marking speeds up to six characters-per-second. It’s an excellent choice for many factory-automated or on-line processes.

FEATURES
- 1-1/2” x 2-1/2” (38.1mm x 63.5mm) marking window
- Rugged, low-maintenance X/Y platform
- Compact Marking Head — approximately 6.6” x 6.2” x 4.7” (168mm x 158mm x 120mm)
- Marks a wide range of materials from soft plastics to hardened steel — up to Rc60
- Shutter assembly protects marking head from solid and liquid contaminants
- Self-Contained, state-of-the-art TMC470 controller features two serial ports, USB port and Ethernet port. (see page 29)
- Dot density up to 200 dots-per-inch (79 dots-per-centimeter)
- Choice of interchangeable marking pin types for depths from 0.001” - 0.018” (0.03mm - 0.45mm)
- Pin travel accommodates surface irregularities to 0.25” (6mm)
- Automatically generates serial numbers, time, date and shift codes
- Stores up to 200 marking patterns
- Easily interfaced to PLCs (Programmable Logic Controllers) and Host Computers

OPTIONS AND ACCESSORIES
- Rotary fixtures for marking circumferences of cylindrical parts
- Marking head mounting post, including programmable Z-axis version
- Panel-mount and IP/NEMA Rated Controllers
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- Powerful Windows based Merlin® III software (see page 29)
- Electric Pin Version Available

Options and Accessories:
- Rotary fixtures for marking circumferences of cylindrical parts
- Marking head mounting post, including programmable Z-axis version
- Panel-mount and IP/NEMA Rated Controllers
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- Powerful Windows based Merlin® III software (see page 29)
- Electric Pin Version Available

A protective shutter assembly shields the TMP1700 marking head from liquid and solid contaminants.
The TMP6100EAS is a special electric pin configuration of the versatile TMP6100 PINSTAMP® marking head, specifically developed for 2-D code applications. It is easily integrated into either on or off-line applications and includes an electromagnetic marking pin and an AUTOSENSE motorized Z-Axis mounting post that ensures a consistent pin stroke for highly repeatable 2-D cell sizes. No operator intervention is required – pattern specific standoff setting ensures that the critical standoff distance is consistently repeated. A great tool for multiple plane marking. Since the marking pin can be positioned anywhere in the generous 6” x 12” (152mm x 304mm) marking window, the TMP6100EAS can mark any character height, style or number of lines desired. Its robotic design allows clear access to the marking window for loading and unloading of parts.

**FEATURES**
- Large 6” x 12” (152mm x 304mm) marking window
- Unique rigid positioning drive features robotic technology
- Marks a wide range of materials from soft plastics to hardened steel — up to Rc60
- Dot density up to 200 dots-per-inch (79 dots-per-centimeter)
- Self-Contained, state-of-the-art TMC470 controller features two serial ports, USB port and Ethernet port. (see page 29)
- RS232 or TCP/IP Host interface to download text to individual fields or call up entire patterns
- Automatically generates serial numbers, time, date and shift codes

Compact Self-Contained TMC470 Controller
Mark up to .018 inches (0.46mm) deep in mild steel with the extremely robust yet highly portable PINSTAMP® Model TMP4500/470E hand held marking system. With an electromechanical pin that eliminates the need for any air supply, the TMP4500/470E is the perfect choice for applications requiring both portability and deep penetration marking.

FEATURES
- Ergonomic dual handle design
- Large 1” x 4” (25mm x 100mm) marking window
- Extremely robust design featuring rugged X-Y platform and all metal enclosure
- Powerful pin drive design for marking depths of up to 0.018” (0.46mm) in mild steel
- Weighs less than 6.6 pounds (3.0kg) - less electronic cables
- Marks at speeds up to 3 characters-per-second
- Self-contained, state-of-the-art TMC470 controller with USB, Ethernet, and 2 serial ports (see page 29)
- Automatically generates serial numbers, date, time and shift codes
- Stores up to 200 marking patterns

OPTIONAL ACCESSORIES
- Bar code scanner for automatic data entry
- Quick disconnect toolposts for use in benchtop applications
- Cable balancer attachment kit
- V-block kit for marking cylindrical parts
- Logo-Font Design software package for the design of custom fonts and logos
- Battery operated carrying case mounted version

Compact Self-Contained TMC470 Controller — no PC required.

DATA MATRIX™ 2-D Code Marking Capability
Meets all Department of Defense UID Requirements and other industry standards
The PINSTAMP® TMP4210/470 is an extremely lightweight, hand-held, single pin marker satisfying a wide range of portable marking applications. Its robust rack-and-pinion design and compact envelope also make it the right choice for many high production, on-line applications.

**OPTIONAL ACCESSORIES**
- Panel-mount and IP/NEMA rated controller options
- Debris Shield Kit protects from solid contaminants
- Cable Balancer Attachment Bracket
- Marking Head Standoff V-Block kit for marking the circumference of cylindrical parts
- Quick disconnect tool post
- Bar code scanner for automatic data entry
- Logo-Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- PC-Based Pattern (marking file) Back-up Utility available FREE from www.telesis.com

**FEATURES**
- Simple, easy to use single pin design
- Compact and ergonomic; weighs about 2.0kg (4.4 pounds)
- Available with 25S or 150SA marking pin
- 2” x 0.5” (50mm x 13mm) marking window
- Economically priced
- Marks 1/8” (3mm) tall characters at up to 3.5 characters-per-second
- Utilizes same rugged rack-and-pinion X/Y platform as field-proven TMM4200
- Detachable electronics cable for improved serviceability
- Self-contained state-of-the-art TMC470 controller features two serial ports, USB and Ethernet ports (see page 29)
- Also available without handle and stand-off for fixtured applications

**COMPACT SELF-CONTAINED**

TMC470 Controller — no PC required.

**DATA MATRIX™ 2-D Code Marking Capability**

Meets all Department of Defense UID Requirements and other industry standards
The PINSTAMP® TMM7200/470 is an extremely heavy duty multiple pin marking system configured on a “per project” basis to provide optimum solutions for individual applications. The TMM7200 is the right choice for the deep penetration marking required for large character sizes, or when marking especially rough surfaces. The flexible TMM7200 can be equipped with up to 21 marking pins, allowing it to print 21 characters in 1.5 seconds. In addition, marking pins can be located on varying horizontal and vertical center distances from 0.25˝ (6mm) to 1.75˝ (44.5mm) to provide a wide range of very large marking windows.
TMM5400/470
PINSTAMP® Multiple Pin Marking System

Equipped with eight marking pins, the PINSTAMP® TMM5400/470 is the fastest dot peen marker available. Its speed and its compact envelope make it the perfect solution for many on-line, high-speed marking applications.

FEATURES

- Marks up to 16 characters-per-second
- Marking windows as large as 0.5” x 3.78” (13mm x 96mm)
- Two marking pin cartridge configurations available to optimize marking window size/cycle time combinations
- Extremely compact marking head for easy integration into factory-automated applications
- Marks a wide range of materials from soft plastics to hardened steel — up to Rc60
- TELESIS’ patented “Floating Pin” technology accommodates surface irregularities up to 0.25” (6mm)
- Self-contained, state-of-the-art TMC470 controller features two serial ports, USB and Ethernet ports (see page 29)
- Automatically generates serial numbers, date, time and shift codes
- Easily interfaced to PLCs (Programmable Logic Controllers) and Host Computers
- Stores up to 200 marking patterns

OPTIONAL ACCESSORIES

- Panel-mount and IP/NEMA-Rated controller options
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- PC-Based Pattern Back-up Utility available FREE from www.telesis.com
Mark up to six characters-per-second with the PINSTAMP® TMM5100/470 Multiple Pin Marking System. Its lightweight, compact design and minimal footprint are ideal for hand-held, stand-alone or completely integrated, factory automated operations. A variety of pin sizes/ configurations are available to mark character heights from .04” - .63” (1mm - 16mm) on a wide range of materials.

**FEATURES**

- High speed — up to six pins marking simultaneously
- Marking windows up to 0.625” x 4.5” (16mm x 114mm)
- Marks a wide range of materials from soft plastics to hardened steel — up to Rc60
- Available with a variety of marking pin cartridge configurations for optimal combination of character size, marking depth, marking window size and cycle time
- Compact, rugged X/Y positioning mechanism
- The right choice for many VIN (Vehicle Identification Number) Marking Applications
- Self-contained, state-of-the-art TMC470 controller features two serial ports, USB and Ethernet ports (see page 29)
- Automatically generates serial numbers, time, date and shift codes
- Stores up to 200 marking patterns
- Easily interfaced to PLCs (Programmable Logic Controllers) and Host Computers
- Pin travel accommodates surface irregularities to 0.25” (6mm)

**OPTIONAL ACCESSORIES**

- Panel-mount and IP/NEMA-Rated controller options
- Marking head support tooling and balancers
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from [www.telesis.com](http://www.telesis.com) for easy software upgrade
- PC-Based Pattern Back-up Utility available FREE from [www.telesis.com](http://www.telesis.com)
The PINSTAMP® TMM4250/470 Multiple Pin Marking System can mark up to eight characters-per-second. It is ideal for many on-line applications with severe spatial constraints — or in wet or dirty environments. The TMM4250 marking head features an extremely compact envelope and provides marking windows up to 0.5” x 2” (13mm x 50mm). It can be easily integrated within a wide range of manufacturing settings. A NEMA 12 (IP55) enclosure with industrial grade, protective rubber “boot” makes it highly resistant to both solid and liquid contaminants, including machine tool coolants.

**FEATURES**

- NEMA 12-Rated (IP55) with rubber boot for protection against solid and liquid Contaminants
- Extremely compact for ease of integration
- Available with four 25S or two 150SA marking pins
- Marks up to eight 0.125” (3mm) high characters-per-second
- Self-contained, state-of-the-art TMC470 controller features two serial ports, USB and Ethernet ports (see page 29)
- Stores up to 200 marking patterns
- Marking windows up to 0.5” x 2” (13mm x 50mm)
- Depths up to 0.013” (0.33 mm) in mild steel
- Rugged rack-and-pinion X/Y platform for low maintenance operation
- Detachable electronics cable for improved serviceability
- RS232 or TCP/IP Host interface to download text to individual fields or call up entire patterns
- Automatically generates serial numbers, date, time and shift codes
- Easily interfaced to PLCs (Programmable Logic Controllers) and Host Computers

**OPTIONAL ACCESSORIES**

- Panel-mount and IP/NEMA-Rated Controllers
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- PC-Based Pattern Back-up Utility available FREE from www.telesis.com

**DATA MATRIX™ 2-D Code Marking Capability**
Meets all Department of Defense UID Requirements and other industry standards
The innovative PINSTAMP® dual-pin TMM4215 provides a 4" x 0.5" (100mm x 13mm) marking window, twice as large as that of the TMM4200. This lightweight, compact marker is available in both fixtured and hand-held configurations.

FEATURES

- Compact, ergonomic design
- Weighs 4.5 pounds (2.0kg)
- Marks up to four 0.125" (3mm) high characters-per-second
- Available with the high-speed 25S marking pin or the deep marking 150SA pin
- Marking depths up to 0.013" (0.33mm) in mild steel
- Rugged rack and pinion X/Y platform for low maintenance operation
- Also available without handle and standoff for fixtured applications
- Detachable electronics cable for improved serviceability
- Self-contained, state-of-the-art TMC470 controller features two serial ports, USB and Ethernet ports (see page 29)
- Automatically generates serial number, time, date and shift codes
- Stores up to 200 marking patterns
- Easily interfaced to PLC’s (Programmable Logic Controllers) and host computers

OPTIONAL ACCESSORIES

- Panel-mount and IP/NEMA rated controller options
- Cable balancer attachment kit
- Marking head standoff V-Block Kit for marking on the circumference of cylindrical parts
- Quick-disconnect tool post
- Bar code scanner for automatic data entry
- Logo-Font Design Software package for design of custom fonts or logos
- PC-based upgrade utility available FREE from www.telesis.com for easy software upgrade
- PC-based Pattern (marking file) Back-up utility available FREE from www.telesis.com

DATA MATRIX™ 2-D Code Marking Capability
Meets all Department of Defense UID Requirements and other industry standards
The unique PINSTAMP® TMM4200 Multiple Pin Marking Head can be equipped with up to four marking pins for very high speed marking, yet weighs only 4.5 pounds (2.0kg). Its light weight, compact ergonomic design, plus optional pistol-grip handle make the TMM4200 the ultimate hand-held permanent marker.

FEATURES

- Compact, ergonomic design
- Weighs 4.5 pounds (2.0kg)
- Available with four 25S or two 150SA marking pins
- Marks up to eight 0.125” (3mm) high Characters-Per-second
- Marking windows up to 0.5” x 2” (13mm x 50mm)
- Depths up to 0.013” (0.33mm) in mild steel
- Rugged rack-and-pinion X/Y platform for low maintenance operation
- Simple shutter plate protects head from solid and liquid contaminants
- Detachable electronics cable for improved serviceability
- Self-contained, state-of-the-art TMC470 controller features two serial ports, USB and Ethernet ports (see page 29)
- Also available without handle and stand-off for fixtured applications
- Automatically generates serial numbers, date, time and shift codes
- Stores up to 200 marking patterns
- Easily interfaced to PLCs (Programmable Logic Controllers) and host computers

OPTIONAL ACCESSORIES

- Panel-mount and IP/NEMA-Rated controller options
- Quick disconnect tool post
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- PC-Based Pattern Back-up Utility available FREE from www.telesis.com

Compact Self-Contained TMC470 Controller — no PC required.
The state-of-the-art servo-driven SS3700/470 Telescrite® Marking System provides permanent low-noise marking at speed/depth combinations not previously attainable. Virtually silent, the SS3700’s robust X/Y platform provides an ample 6” x 2” (152mm x 51mm) marking window, making it the optimum choice for many both manual and automated VIN marking applications, especially those with speed/depth requirements beyond those of traditional stepper motor-driven designs. Marker performance characteristics vary significantly depending on the specifics of the applications, including the material being marked, the thickness of the material and the air pressure setting. When marking cold rolled steel with a thickness of .030” (.75mm) or more, marking depths of at least 0.1mm (.004” inches) can be expected and when marking thinner, softer materials marking depths of up to 0.2mm (.008”) can frequently be achieved, even at marking speeds of up to 2 characters-per-second for 7mm (.276”) characters.

The system’s stand-alone TSC470 Controller is equipped with an integral keyboard and LCD display and provides a simple user friendly operator interface with no PC required. In addition, the TSC470’s discrete I/O, serial and Ethernet ports provide the communications capabilities required for factory automated applications.

FEATURES

- Provides performance far beyond conventional step per motor-driven scribe markers.
- Permanent, virtually silent marking in a wide range of materials. (Maximum noise level approximately 72db.)
- High speed marking of 7mm tall high quality characters at up to 2 characters-per-second.
- Marks at depths up to 0.1mm (.004”) in cold rolled steel.
- Large 6” x 2” (152mm x 50.8mm) marking window
- Easily integrated into a wide range of automated online and manual applications.
- The perfect choice for many VIN marking applications.
- TSC470 controller based on field proven TMC470.

OPTIONAL ACCESSORIES

- Marking head mounting post with base
- Panel-mount and IP/NEMA-Rated Controllers (see page 52)
- Marking head support tooling and balancers
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- PC-Based Pattern Back-up Utility available FREE from www.telesis.com

The perfect choice for many VIN marking applications.

The TSC470 controller based on field proven TMC470.

Meet all Department of Defense UID Requirements and other industry standards
The powerful, extremely heavy-duty Telescribe® SC5000/470 is the right choice when deep, low noise marking is required. It is especially well-suited for VIN (Vehicle Identification Number) marking applications.

**FEATURES**

- Extremely low noise marking
- Powerful, rugged marking head drive mechanism for deep scribe marking
- 2.5” x 7.5” (63.5mm x 190.5mm) marking window
- Especially well suited for VIN (Vehicle Identification Number) applications
- Self Contained, state-of-the-art TMC470 controller features two serial ports, USB and Ethernet ports (see page 29)
- Automatically generates serial numbers, date, time and shift codes
- Easily interfaced to PLCs (Programmable Logic Controllers) and Host Computers
- Marks a wide range of materials from soft plastics up to hardened steel
- Stores up to 200 marking patterns

**OPTIONAL ACCESSORIES**

- Marking head support tooling and balancers
- Panel-mount and IP/NEMA-Rated controller options
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- PC-Based Pattern Back-up Utility available FREE from www.telesis.com
- Optional SS5500/470 Servo Motor Driven Versions Available For High Speed Applications

Compact Self-Contained
TMC470 Controller — no PC required.

DATA MATRIX™ 2-D Code Marking Capability
Meets all Department of Defense UID Requirements and other industry standards
Virtually silent, the economical Telescribe® SC3500/470 inscribes high quality, continuous line characters in most metals and plastics. It is well suited for a wide range of automated on-line and stand-alone bench top applications.

FEATURES
- Extremely low noise marking
- Durable, heavy duty marking head provides large 4” x 6” (100mm x 150mm) marking window
- Economically priced Scribe Marker, well suited for a wide range of automated on-line and stand-alone Bench Top applications
- Self contained, state-of-the-art TMC470 controller features two serial ports, USB and Ethernet ports (see page 29)
- Automatically generates serial numbers, date, time and shift codes
- Easily interfaced to PLCs (Programmable Logic Controllers) and Host Computers
- Marks a wide range of materials from soft plastics up to hardened steel
- Stores up to 200 marking patterns

OPTIONAL ACCESSORIES
- Marking head mounting post with base
- Panel-mount and IP/NEMA-Rated Controllers (see page 47)
- Marking head support tooling and balancers
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- PC-Based Pattern Back-up Utility available FREE from www.telesis.com

Compact Self-Contained TMC470 Controller — no PC required.
The BenchMark® 460 is a fully programmable, cost effective alternative to old-fashioned permanent marking techniques for parts too large or heavy to be carried to a marking station. Its hand-held marking head is lightweight and ergonomically designed, while providing a generous 1” x 4” (25mm x 100mm) marking window. An electromechanical marking pin eliminates the need for any air supply, making the BenchMark® 460 truly portable.

**FEATURES**

- Compact, ergonomic marking head weighs only 1.7kg (3.75 pounds)
- Generous 1” x 4” (25mm x 100mm) marking window
- High quality, permanent, programmable marking on a wide range of materials — from soft plastics to hard metals up to Rc60
- No consumables
- Electromechanical marking pin eliminates the need for air supply
- Marks up to 5 characters-per-second
- Automatically generates serial numbers, as well as date, time and shift codes

**OPTIONAL ACCESSORIES**

- Bar Code Scanner for automatic data entry
- Logo-Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- PC-Based Pattern (marking file) Back-up Utility available FREE from www.telesis.com
- Benchmark® 460+ version with enhanced communications capabilities

Fully programmable Battery Operated BenchMark® 460 with charger fully packaged in a rugged, convenient carrying case

COMPACT SELF CONTAINED BenchMark® 470 Controller - no PC required

QR Code Web Page Product Link
DATA MATRIX™ 2-D Code Marking Capability
Meets all Department of Defense UID Requirements and other industry standards
The BenchMark® 320 is an extremely versatile yet economically priced benchtop marking system. It offers a generous 4” x 6” (100mm x 150mm) marking window large enough to satisfy almost any application. And its unique marking arm design is extremely convenient for parts loading and unloading as well as marking pattern design. The system is self-contained with compact controller and rugged extruded aluminum mounting post and base.

**FEATURES**

- High quality, permanent, programmable marking on a wide range of materials — from soft plastics to hard metals up to Rc60
- Large 4” x 6” (100mm x 150mm) marking window
- Marking arm allows clear access for loading and unloading of parts
- Electromechanical marking pin eliminates the need for air supply
- Marks up to 5 characters-per-second
- Automatically generates serial numbers, as well as date, time and shift codes
- Compact, convenient controller with membrane keyboard and LCD display — no PC required

**OPTIONAL ACCESSORIES**

- Rotary fixture for marking circumferences of cylindrical parts
- Bar Code Scanner for automatic data entry
- Start-Print footswitch and pushbutton station
- Logo/Font design software package for design of custom fonts or logos
- PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
- PC-Based Pattern Back-up Utility available FREE from www.telesis.com
- **Benchmark® 320+** version with enhanced communications capabilities
- **Benchmark® 320M** system with Windows based Merlin® III software available (see page 29)

“I want to thank TELESIS for manufacturing a product that performs as well in real life as it states in your literature. Our new BenchMark® 320 Marking System from TELESIS has performed above our expectations since putting it into service. The BenchMark® 320 greatly simplified our identification tag printing process and provided Krispy Kreme with “just in time” tag production capabilities. If you are looking for high quality, flexibility and reliability in permanent marking equipment, TELESIS has the solution.”

Jeff Renz, Krispy Kreme

**DATA MATRIX™ 2-D Code Marking Capability**

Meets all Department of Defense UID Requirements and other industry standards
The BenchMark® 200 is an extremely economical, fully programmable alternative to old-fashioned permanent marking techniques. This complete system, with self-contained controller and extruded aluminum marking head mounting post and base, is the right choice for many stand-alone bench top marking applications. An electromechanical marking pin eliminates the need for any air supply, making it easy to move the BenchMark® 200 from one work area to another.

FEATURES
• Extremely affordable
• High quality, permanent, programmable marking on a wide range of materials — from soft plastics to hard metals up to Rc60
• Ample 4” x 4” (100mm x 100mm) marking window
• Electromechanical marking pin eliminates the need for air supply
• Marks up to 5 characters-per-second
• Automatically generates serial numbers, as well as date, time and shift codes
• Compact, convenient controller with membrane keyboard and LCD display — no PC required

OPTIONAL ACCESSORIES
• Rotary fixture for marking circumferences of cylindrical parts
• Bar Code Scanner for automatic data entry
• Start-Print footswitch and pushbutton station
• Logo/Font design software package for design of custom fonts or logos
• PC-Based Upgrade Utility available FREE from www.telesis.com for easy software upgrade
• PC-Based Pattern Back-up Utility available FREE from www.telesis.com
• BenchMark® 200+ version with enhanced communications capabilities

DATA MATRIX™ 2-D Code Marking Capability
Meets all Department of Defense UID Requirements and other industry standards
Manufacturers are increasingly turning to the use of 2-D code direct part marking (DPM) and reading technologies. DPM reduces costs, improves quality, and satisfies a number of industry-specific and government mandates, including U.S. Department of Defense UID (Universal Identification) requirements. Successful implementation requires the integration of robust, industrial marking systems with 2-D code verifiers located at the marking station. Together, they insure the ability to easily read and track the 2-D code.

TELESIS’ extensive experience in the automotive, aerospace and firearms industries makes us uniquely qualified to provide, completely integrated, “mark-read” solutions. We offer the following products and services to satisfy a wide range of 2-D code applications:

• TELESIS PINSTAMP® Dot Peen Marking Systems
• TELESIS Laser Marking Systems
• Expert integration of these TELESIS products, as well as the integration of 2-D code verifiers marketed by a number of suppliers

PINSTAMP® Markers provide an effective but extremely economical solution to many 2-D code DPM applications on materials as diverse as plastics and hardened steel. TELESIS’ patented PINSTAMP® Marking Technology provides highly accurate dot placement at specific X/Y locations. This process makes PINSTAMP® Markers far superior to conventional “oscillating stylus” dot peen markers, especially in QR and other 2-D code applications, where accurately marked codes are the key to readability. TELESIS’ Laser Marking Systems are truly “state-of-the-art”, producing almost perfectly formed 2-D codes nearly instantly on a wide range of materials, including virtually all plastics and metals. These qualities make lasers the perfect choice for applications requiring extremely high throughput or very small QR or other 2-D codes.

COMPLIANCE

All TELESIS Laser Marking Systems and all PINSTAMP® Markers except for the TMM5100/420 and TMM7200 comply with all major 2-D code DPM standards, including:

• SAE AS9132 (as adopted by the International Aerospace Quality Group)
• AIAG B-4
• AIAG B-17
• AIM DPM-1-2006
• NASA-STD-6002
• NASA-STD-HDBK-6003
• Department of Defense Guide to Uniquely Identifying Items (UID)
• MIL-STD-130N
• ATA SPEC-2000
Choose from a variety of accessories to enhance your TELESIS Pin Marking System. All are tested for compatibility and carry a one-year limited warranty. Ask your TELESIS Sales Representative about the options best suited for your application.

- Rotary Fixtures
  For easy circumferential marking

- Bar Code Scanners and Wands
  Eliminate manual data entry

- A variety of Industrial Controller Enclosures are Available
  Protect control components from harsh environments.
  Several wall and floor-mount styles/colors available

- Four Wheeled Carts
  For portable applications

- Marking Head Gimbals, Stand-offs and Cable Balancers
  For flexible, virtually weightless, hand-held marking

- Manual Push Button Stations and Foot Switches
  For manual control of on-line automated marking stations and remote start control

- Marking Head Mounting Posts
  With manual, pneumatic or stepper motor-driven head positioning mechanisms

In addition, TELESIS offers expert integration of our entire range of pin marking systems, including software, hardware and control system design services. Whether it’s a stand-alone manual marking station or a fully automated on-line factory-integrated application, TELESIS can provide a complete solution to your marking system requirements.
